MARCH 2015

Oeffentliche Versicherung Braunschweig decides on Conigma™

> **Objectives are to ensure IT audit compliance while simplifying safety-critical activities such as, e.g. SAP Transport Management**

Munich, 16 March 2015 - The Galileo Group AG, one of the leading providers of software solutions for release, change & transport management for SAP®, announces that the Braunschweig-IT GmbH (=B-IT), IT subsidiary and IT service provider of the Oeffentlichen Versicherung Braunschweig have decided on the introduction of Conigma™ CCM.

As the leading insurance provider of the area with a market share of up to 50% in individual segments, the Oeffentliche Versicherung Braunschweig serves 360,000 private clients and more than 40,000 corporate clients with a portfolio that includes all the classic insurance and financial services.

Through the use of Conigma™ CCM, B-IT expects improvements in efficiency in the roll outs of complex releases, both within individual SAP system landscapes, as well as across all SAP system landscapes and non-SAP technologies. The release and approval processes should be documented and orchestrated taking regulatory requirements as well as the requirements of the auditing into account and provided with easy to adapt degrees of freedom. A significant simplification of the software distribution process is also planned.

"Following extensive experience with the free-of-charge license of the previous solution, our focus was on product selection including the out-of-the-box flexibility of the software to be purchased paired with

product maturity in a complex, multilevel system landscape", explains Ulrich Stock, Head of Systems Operations in summarising the decision-making process.

Conigma™ Suite includes not only core product Conigma™ CCM for the control and administration of IT processes for SAP change, release and transport management, but also Conigma™ QCOPY for software recovery based on SAP system copies and Conigma™ DEVSYNC for the synchronization of parallel SAP development systems.

About Galileo Group AG

Renowned blue-chip clients in Europe, Asia and the Americas – including MAN Postbank, Siemens, ThyssenKrupp and the Zürcher Kantonalbank – place their trust in the competence of the Galileo Group with its twin commercial departments of IT Services and Software.

With its SAP® release, change & transport management software Conigma™, the group's subsidiary Galileo Tools sees itself as a market leader in the industrialization of SAP operations. It has been proven that over 7% of SAP costs can be saved each year.

In its other business sector, IT Services, Galileo places itself in the 2% of suppliers who have at their disposal both top expertise in the area of SAP Basis and also the supporting technologies required, such as Java/J2EE and .NET.
