TRUMPF Chooses Conigma™

> **The goal is the industrialization of SAP software change and maintenance processes including IT compliance and an increase in efficiency**

Munich, 03/27/2014 - The Galileo Group AG, a leading provider of software solutions for SAP® release, change and transport management, announces that TRUMPF GmbH + Co. KG, Ditzingen, has opted for the use of Conigma™ CCM.

The TRUMPF Group ranks among the world's largest providers with a focus on machine tools as well as laser and medical technology. With 58 operating subsidiaries, the Group is represented almost everywhere in Europe, in North and South America and Asia as well. Production sites are located in Germany, China, France, Great Britain, Japan, Mexico, Austria, Poland, Switzerland, Singapore, the Czech Republic and the US. In addition, TRUMPF operates with subsidiary TRUMPF Financial Services, the world's first universal bank for mechanical engineering.

By using Conigma™ CCM TRUMPF is expecting easily adaptable support of the newly developed SAP software lifecycle processes. In addition, the respective protection of investment / future prove of investment should be ensured for the rising demands on the productivity of the customer's internal SAP IT in the medium term.

"Following a detailed analysis of the different software vendors in Germany - including the license-free standard solution - we opted for the most flexible and customizable software - Conigma™ CCM",

summarizes Jürgen Küchle, Head of IT Application Development. "The current project results have proved that our choice was a good one. It's not always our experience, that suppliers deliver before agreed milestones". In addition, Sebastian Reim, head of the Conigma™ implementation project, adds: "Even tasks such as the customization of multi-stage, flexible approvals by different roles for different change types with a complete audit trail in SAP was set up without any special effort. The simplicity of Conigma™ implementation allowed us to complete the current phase of the project despite unplanned prototyping cycles on-time and within the budget".

Conigma™ Suite includes not only core product Conigma™ CCM for the control and administration of IT processes for SAP change, release and transport management, but also Conigma™ QCOPY for software recovery based on SAP system copies and Conigma™ DEVSYNC for the synchronization of parallel SAP development systems.

About Galileo Group AG

Renowned blue-chip clients in Europe, Asia and the Americas – including MAN Postbank, Siemens, ThyssenKrupp and the Zürcher Kantonalbank – place their trust in the competence of the Galileo Group with its twin commercial departments of IT Services and Software.

With its SAP® release, change & transport management software Conigma™, the group's subsidiary Galileo Tools sees itself as a market leader in the industrialization of SAP operations. It has been proven that over 7% of SAP costs can be saved each year.

In its other business sector, IT Services, Galileo places itself in the 2% of suppliers who have at their disposal both top expertise in the area of SAP Basis and also the supporting technologies required, such as Java/J2EE and .NET.
