

## Press Release

### Latest iX Study of Collaboration Software praises Conigma™ for SAP Netweaver®

*With the integration of Conigma™, CollabNet becomes the only manufacturer surveyed to offer an integrated and automated distribution of SAP changes in ABAP™ and Java.*

**Munich, December 06, 2007** - The Galileo Group AG, a leading provider of software solutions for the application and transport management of SAP® products, has assisted its partner CollabNet Inc to achieve an outstanding rating in iX Study of collaboration software - released in June 2007 - in the sphere of software development and distribution based on SAP's Netweaver® platform.

This recent survey describes significant advances in association with the CollabNet Enterprise Edition in particular for distributed development environments using heterogeneous technologies, i.e. the classic client/server world and SAP® technologies. The study reports that in this respect Conigma™ permits the "integration of Change Requests for SAP Netweaver® in the principles of the CollabNet world". Tickets, Change Requests and similar artifacts are displayed by Conigma™ in the SAPgui and can be linked simultaneously with changes in the ABAP section and in the Java-based section of SAP Netweaver®, to ensure that defined IT processes are adhered to. "This consequently forms the foundation for an integrated, automated distribution of SAP configurations," continues the study.

"Our Conigma Suite enables our partner CollabNet to cover now also the development processes for SAP's Netweaver®. CollabNet is the only manufacturer involved in the study who can depict integrated configuration management and software distribution in the ABAP-based Transport Management System (TMS) and in the Change Management System (CMS) for the Java-based SAP NetWeaver® channels. This means that even for

distributed, separate developments using the most popular SAP® technologies, consistent process adherence with quality maintained and automated software distribution is guaranteed," explains Malte Klassen, CEO of the Galileo Group.

### **About the Galileo Group**

The Galileo Group AG is one of the leading providers of Application and Transport Management solutions for SAP. The Conigma™ suite integrates administration and processes for further developing, adapting and customizing SAP software seamlessly with existing IT support infrastructure, such as SAP procedures for allocating software (ABAP TMS and Java CMS). This results in significant rationalization potential based on the more efficient, automated development and change processes; in addition, IT compliance initiatives are given optimal support by means of wide-ranging workflow functionalities and the detailed recording of all procedural steps.

The clients of Galileo Group include LSV (Landwirtschaftliche Sozialversicherung), Postbank, Siemens AG and Züricher Kantonalbank. Galileo Group AG may be found in the Internet under <http://www.galileo-group.de>.
