

Press Release

Galileo Group AG expands to North America

Globally active Conigma™ clients and increasing demand from the USA drive expansion internationally; SCM Solutions will be one North American partner for Galileo's distribution and consultancy

Las Vegas, October 3, 2007- The Galileo Group AG, one of the leading suppliers of software solutions for application and transport management for use with SAP® applications, has announced its latest partnership agreement with SCM Solutions Inc., based in Victoria, BC, Canada. The Galileo Group will now be represented in North America not only by its technology partner CA (formerly Computer Associates) but also by CA's integration partner SCM Solutions, which concentrates on consultancy and integration activities in the United States of America – in New York, for example – while also operating in Australia.

In taking this step, the Galileo Group is responding to considerable demand from its Conigma™ clients, who are increasingly using its Application Management products for use with SAP solutions not only throughout Europe but also in IT factories located in different continents. And with the mounting success of Conigma in Europe, the Galileo Group confidently expects to see worldwide sales rise. This is where SCM Solutions has a vital role to play: after many years as CA's integration partner, with experience in Software Change Management, Project and Portfolio Management and the fields of Service Desk and Service Support, SCM Solutions will be an optimal distribution partner – not least of which is due to its broad client base.

"The USA is clearly a developing market for Conigma, where many of our customers also use solutions from SAP," explained Malte Klassen, CEO of the Galileo Group. "SAP has experienced increased sales in North America, and it

is crucial for us to be able to serve our clients in North America as well. By the very nature of our products, we are addressing not only isolated organizational units within our client companies but teams working over several continents - which are growing in importance."

Today's announcement was made at TechEd '07 Las Vegas, SAP's largest technical education conference.

About the Galileo Group

The Galileo Group AG is one of the leading providers of Application and Transport Management solutions for use with SAP applications. The Conigma suite integrates administration and processes for seamlessly developing, adapting and customizing SAP solutions with existing IT support infrastructure, such as procedures for allocating software (ABAP™, TMS and Java CMS). This results in significant rationalization potential based on the more efficient, automated development and change processes. In addition, IT compliance initiatives are given optimal support by means of wide-ranging workflow functionalities and the detailed recording of all procedural steps.

The clients of Galileo Group include LSV (Landwirtschaftliche Sozialversicherung), Postbank, Siemens AG and Züricher Kantonalbank. Galileo Group AG may be found in the Internet under <http://www.galileo-group.de>.
