
JANUARY 2011

Entering the New Year with an Excellent Foundation

- > 30% increase in turnover based on healthy developments in both software and service activities**

Munich, 27th January 2011 – Galileo Group AG, one of the leading providers of release, change & transport management solutions for SAP, has announced that the group's revenue for the year 2010 shows a 30% increase over the previous year.

This result means that the Galileo Group has significantly exceeded the industry's general growth forecast, and consequently Galileo has an outstanding foundation for the further development of its business activities in 2011.

The increased income is rooted in the successful introduction of Release 3.5 of Conigma™ CCM. This new version provides significant improvements in the realm of automating SAP development with the focus on change, release and transport management. The new features include improved document administration, better overtaker analysis and simplified customization.

Galileo's IT Services sector has benefited from the rejuvenated business activities of clients in the service, insurance and automotive industries.

“Our Conigma™ software has enabled us to win over more significant clients, including a major Swiss bank,” explains Malte Klassen, CEO of Galileo Group AG. “In addition to this, know-how transfer from our services department is providing valuable impulses for the new Conigma release we shall be launching in 2011.”

About Galileo Group AG

Renowned blue-chip clients in Europe, Asia and the Americas – including BMW, MAN Postbank, Siemens, ThyssenKrupp and the Zürcher Kantonalbank – place their trust in the competence of the Galileo Group with its twin commercial departments of IT Services and Software.

With its SAP® release, change & transport management software Conigma™, the group's subsidiary Galileo Tools sees itself as a market leader in the industrialization of SAP operations. It has been proven that over 7% of SAP costs can be saved each year.

In its other business sector, IT Services, Galileo places itself in the 2% of suppliers who have at their disposal both top expertise in the area of SAP Basis and also the supporting technologies required, such as Java/J2EE and .NET.
